To all Dorset Councils:

We, the undersigned, ask you to divest Dorset from fossil fuels and switch to renewable, sustainable and environmentally cleaner and safer sources of energy.

This includes taking a stance against and rejecting any future requests for hydrocarbon exploration, appraisal and extraction in Dorset and beyond.

Fossil fuels are now proven to be responsible for a large, and growing, number of detrimental effects which harm the natural environment, people, and wildlife. No economic case can be made to justify the damage being done, nor to support the remedial action necessary to prevent damage being passed on to future generations.
